

Primary Care Commissioning Committees in Common

vaccinations from Thornton Little Theatre over a weekend, ensuring they followed the CQC guidance on providing clinics outside general practice.

The Communications Team have provided practices with a press release for their website informing their patients about the importance of obtaining this year's flu vaccination.

3. Data

The national flu data is captured on Immform, unfortunately this data isn't available until November. In order to receive the most up to date data we have asked the Data Quality Team to provide weekly data from the practice system. This information will show the number of patient's eligible for the vaccination and the number of patients vaccinated in that cohort. This data will be shared with the Winter Planning group and the A&E Delivery Board.

4. Recommendation

The Primary Care Commissioning Committee is asked to note the contents of this paper.
